PROFESSIONAL PROFILE

Naval Architect and Marine Engineer with professional experience in shipbuilding project management, marine equipment procurement, technical documentation, and coordination with shipyards, suppliers, manufacturers, and other stakeholders. Currently working at A.K. Sobhan Traders, managing project-related activities through procurement coordination, document preparation and review, technical communication, progress monitoring, and follow-up to support timely project execution. Previously served as a Resident Engineer on a Bangladesh Coast Guard dockyard infrastructure project under BRTC–BUET, gaining practical experience in construction supervision, QA/QC, design verification, and structural inspection. Equipped with a strong technical foundation in marine engineering, vessel design, and structural analysis, combined with practical skills in project coordination and technical problem-solving.

WORK EXPERIENCE

Jr. Naval Architect — *Banani, Dhaka*
AK Sobhan Traders — *07/2026 – Present*

Project: 70-Ton Bollard Pull Tugboat Project for Payra Port Authority (PPA), built by Khulna Shipyard Ltd. (KSY), with A.K. Sobhan Traders (AKST) serving as the total package supplier for Tugboat-1 and Tugboat-2.

Key Responsibilities:

- Manage and coordinate project activities for PPA 70-Ton Bollard Pull Tugboat Projects (Tugboat-1 and Tugboat-2).
- Coordinate procurement of marine equipment, machinery, spare parts, and shipbuilding materials.
- Communicate with shipyards, OEMs, suppliers, and service engineers regarding technical and project matters.
- Prepare and manage technical documents, official correspondence, specifications, and project records.
- Monitor equipment delivery, installation progress, pending issues, and project milestones.
- Coordinate OEM service engineer visits, commissioning schedules, and Harbour Acceptance Tests (HAT).
- Review technical quotations, equipment specifications, drawings, and supplier submissions.
- Follow up on technical issues, pre-commissioning requirements, and equipment readiness.
- Prepare progress updates and coordinate project-related communication between AKST, KSY, and suppliers.

Resident Engineer — *Gazaria, Munshiganj, Bangladesh*
BRTC–BUET Project | Bangladesh Coast Guard Dockyard — *01/02/2026 – 06/2026*

Engineering consultancy project under BRTC–BUET, delivering design review, technical supervision, and QA/QC support for marine infrastructure development.

- Supervised the construction of the dockyard slipway, ensuring adherence to quality standards and timely achievement of project milestones.
- Conducted comprehensive QA/QC and design verification of structural drawings and on-site works.
- Inspected foundations, alignments, and concrete works to guarantee compliance with engineering specifications and standards.

Teaching Assistant — *Dhaka, Bangladesh*
Bangladesh University of Engineering and Technology — *01/11/2024 – 31/05/2025*

Assisted in laboratory sessions and contributed to structural analysis coursework, supporting data analysis, simulations, and academic evaluations.

Engineer Intern *Chattogram, Bangladesh*
Karnafuly Ship Builders Ltd (KSBL) *01/10/2022 – 31/12/2022*

- Monitored shipbuilding processes, including hull fabrication, welding, and machinery installation.
- Assisted in interpreting design drawings and production layouts to ensure accuracy and compliance.
- Supported material verification and coordinated supply chain activities in accordance with engineering specifications.

PROJECTS AND DESIGN EXPERIENCE

48-Foot Catamaran Piping System Design *2026*
3D Piping Layout and 2D System Schematics

Currently working on the piping system design for a 48-foot catamaran using an existing Rhino 3D model, including:

- Developing 3D piping layouts and equipment placement.
- Designing piping arrangements for fuel, freshwater, air conditioning, bilge, and heating systems.
- Preparing 2D piping schematics for system layout and technical documentation.

36 m Research Vessel Design *2026*
General Arrangement, 3D Modelling, Structural Design, and CFD Analysis

Contributed to the design and engineering analysis of a 36 m research vessel, including:

- Developed the General Arrangement (GA) drawing and 3D vessel model.
- Prepared fin arrangements and midship section design.
- Assessed structural integrity using Bureau Veritas (BV) software.
- Conducted Computational Fluid Dynamics (CFD) analysis to evaluate vessel hydrodynamic performance.

Design Of A 1800 Ton DWT Inland Cargo Vessel on Dhaka-Chattogram Route *2022*

Designed the vessel's hull and structure, performing stability and weight distribution analysis in compliance with marine standards.

- Successfully designed a 1800 DWT inland cargo vessel for Dhaka–Chattogram route.
- Ensured structural integrity and stability under operational conditions.
- Optimized weight distribution and hull performance for efficient cargo transport.
- Complied with marine safety and regulatory standards.

EDUCATION

MSc in Naval Architecture & Marine Engineering *Dhaka*
Bangladesh University of Engineering and Technology *11/2024 – Current*
Grade: 3.25 Website Link: https://www.buet.ac.bd

BSc in Naval Architecture & Offshore Engineering *Dhaka*
Bangladesh Maritime University *03/02/2019 – 23/03/2024*
Grade: 3.56 Website Link: https://bmu.edu.bd/

RESEARCH & TECHNICAL EXPERIENCE

Junior Research Fellow
Bangladesh Research Society

Conducted engineering data analysis utilizing advanced analytical tools to support research outcomes. Performed comprehensive literature reviews to identify research gaps and inform study objectives. Contributed to the drafting and editing of technical reports and research papers for publication. Assisted in organizing and maintaining research documentation and datasets. Collaborated effectively with team members to ensure accuracy, consistency, and timely completion of research tasks.

Research Assistant

- Performed structural and safety-related data analysis for shipbreaking yards
- Developed Python and ML models to identify accident risk patterns
- Conducted data cleaning, visualization, and technical reporting

DIGITAL SKILLS

- Excel
- AutoCAD
- Python Programming
- Ship Design Software (Maxsurf)
- Abaqus
- Rhino (Rhinoceros 3D)

PUBLICATIONS

Development of a Python Code for Propeller Design Calculation and Additive Manufacturing Procedure. *01/12/2024*

Bangladesh Maritime Journal, 9(1)
